Global Operations

Our Product Portfolio and Services

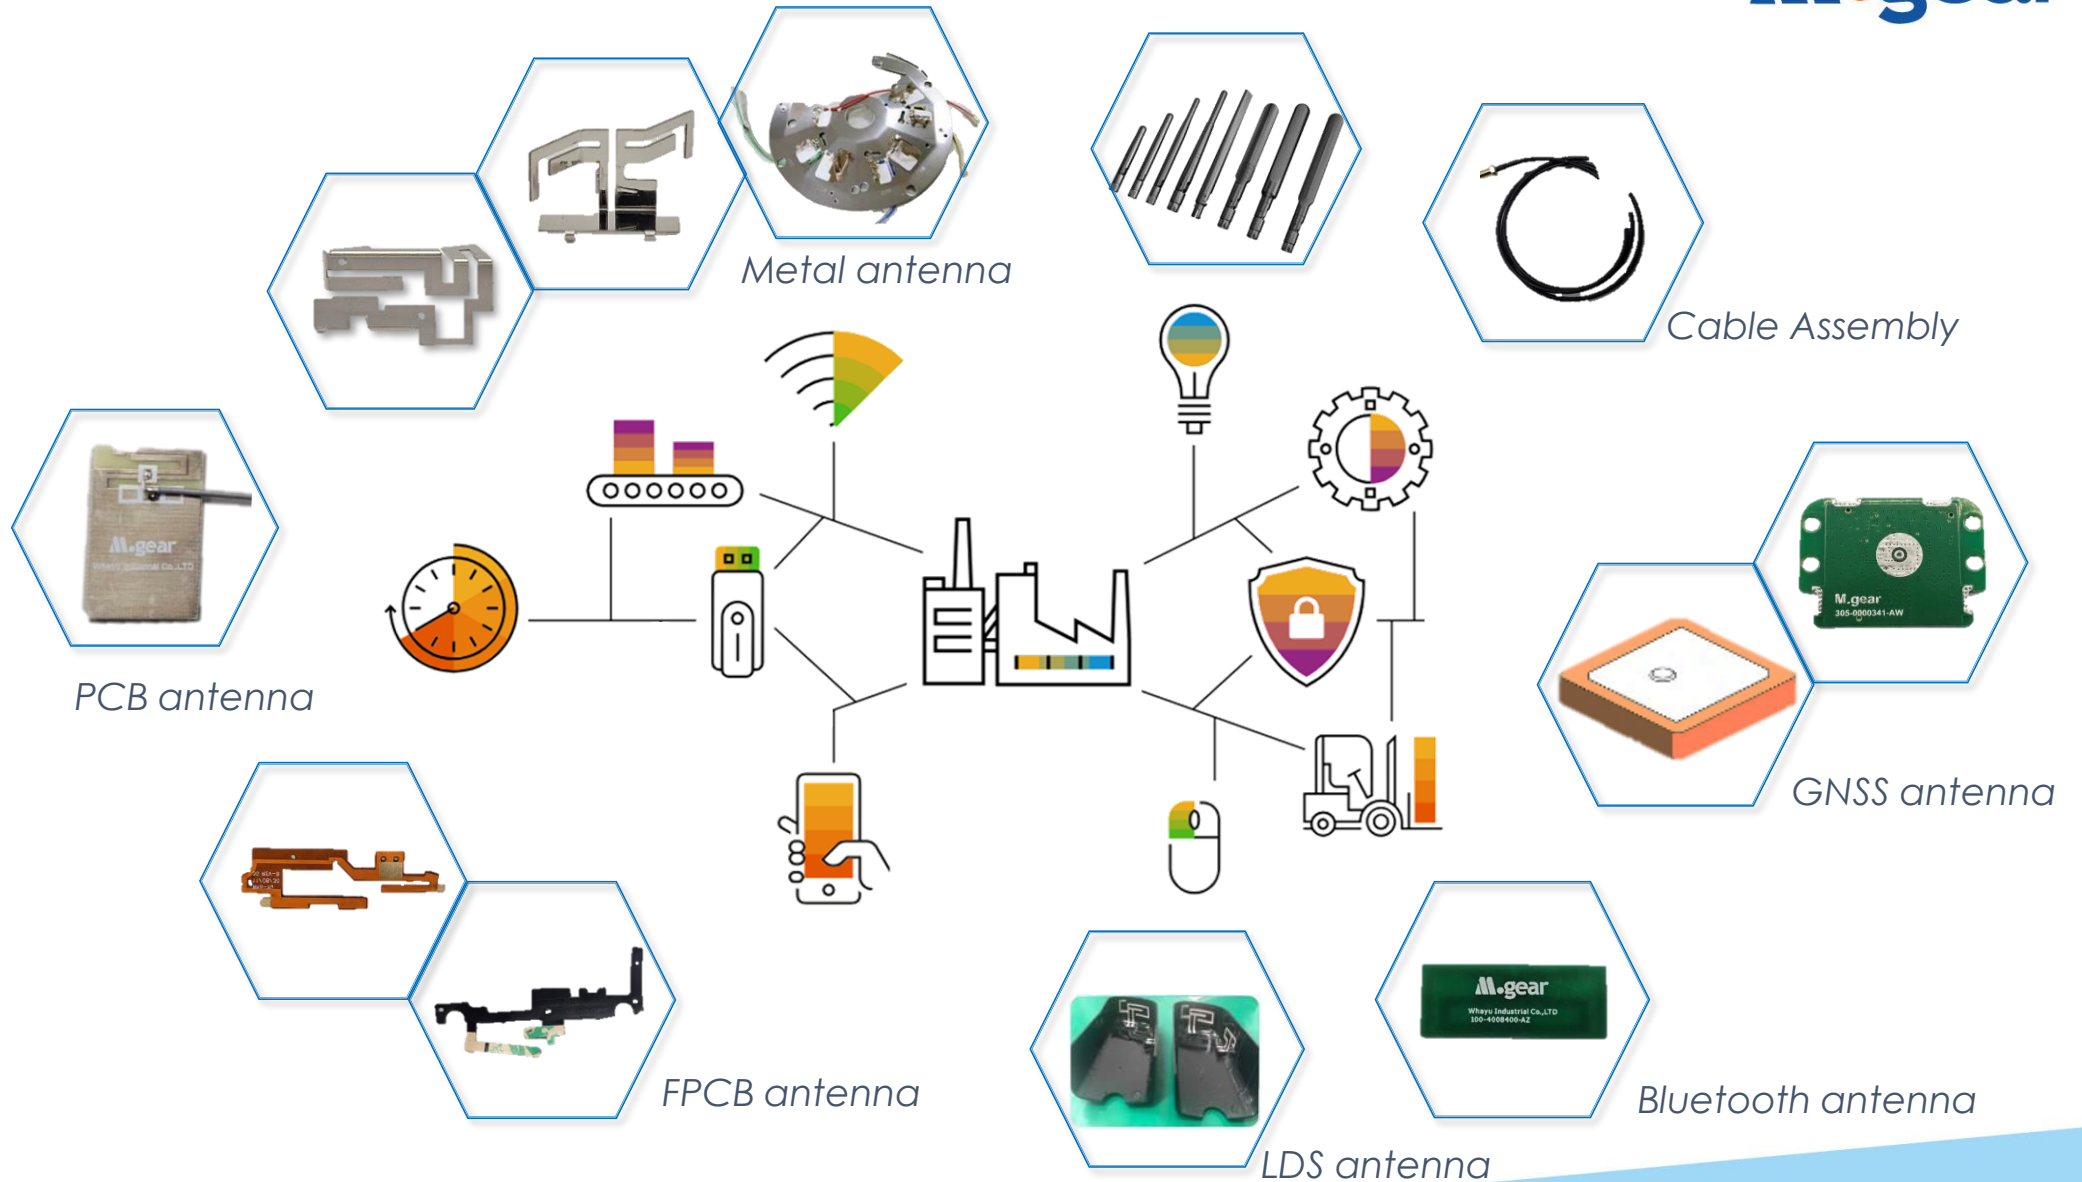

We partner with VARs, Distributors, Systems Integrators and OEMs to enable them to deliver innovative wireless solutions to their customers that leverage our portfolio of products and manufacturing services.

Customization Antenna

- ✓ Sub-6G
- ✓ 5G NR
- ✓ 4G LTE
- ✓ Wi-Fi 6E/7

EMS Service

PCB Assembly

We provide professional one-stop services for assembly, testing, inspection, and packaging, all conducted in a clean production environment with standardized procedures and certified quality systems.

OEM , ODM, JDM Turnkey

We have extensive experience in OEM/ODM/JDM projects, **particularly with RF-related products**, covering all stages from prototyping and procurement to manufacturing, testing, packaging, and distribution.

NPI (New Product Introduction)

To help solve foreseeable problems, integrate resources, and ensure efficient mass production in the shortest time. Reduce costs, speed up time to market, and gain a competitive edge.

Professional Prototyping Services

Our flexible team responds quickly and effectively to customer needs, providing fast sample production services to shorten time-to-market and help customers gain a competitive edge.

Core Competence
